Professional Experience

IBM Canada

Markham, Ontario

SECURITIES DATABASE ENGINEER

Sep. 2019 - Sep. 2021

- Designed and implemented SQL queries to streamline database operations for mutual funds, improving efficiency by 30% and minimizing manual errors.
- Converted over 100+ daily client requests into executable tasks, driving precise updates to the Security Masters Database and ensuring data accuracy.
- Engineered Excel VBA scripts to automate data transformation processes, ensuring compliance with software requirements.
- Conducted thorough validation and enrichment of data using a variety of research tools, integrating reliable data sources into the system.
- Authored comprehensive documentation for internal tools, outlining clear guidelines for software usage and maintenance.
- Worked closely with colleagues to troubleshoot complex database issues, methodically tracing root causes, then deploying strategic fixes that enhanced system reliability and prevented future disruptions.
- Worked closely with colleagues to troubleshoot complex database issues, methodically tracing root causes, then deploying strategic fixes that enhanced system reliability and prevented future disruptions.

Imported Brands of Canada

Toronto, Ontario

IT TECHNICIAN

Mar. 2014 - Jan. 2019

- Maintained system efficiency by monitoring computers, systematically recording performance stats to ensure consistent functionality and identify potential issues.
- Managed software and OS installations, configurations, and updates, optimizing system performance and security.
- Upgraded and optimized hardware components, enhancing system capabilities and reliability.
- Applied analytical skills and a methodical approach to diagnose and resolve hardware issues, reducing downtime and enhancing system reliability.
- Provided technical support, including data backup and recovery, network troubleshooting, and remote desktop assistance, ensuring seamless user experiences.

Skills

Languages

JavaScript, Java, SQL, C, Python, HTML, CSS

Libraries & Technologies

React, Typescript, Express, Node.js, RESTful APIs, DB2, Git, AWS, GraphQL, MongoDB, Figma, Agile, UNIX, Linux

Hobbies

Puzzles, Gaming, Learning New Things, Basketball, Music

Projects

Guess The Spanish Word

[Visit Application](#)

FULL STACK MERN WEB APP

- Developed a dynamic MERN web app for language learning, offering engaging activities for basic Spanish proficiency
- Applied Agile SDLC methodology to independently develop and manage the project efficiently, ensuring timely delivery and flexibility in adaptation
- Maintained version control via Git, ensuring seamless collaboration and easy tracking of project changes
- Utilized CSS to craft an intuitive and responsive UI, enhancing user experience across various devices and screen sizes
- Created reusable components and hooks using React.js, streamlining development and promoting code efficiency
- Designed a robust back-end endpoints using Node.js, Express and MongoDB for efficient data management and scalability
- Utilized MongoDB's non-relational database to maintain, modify and manipulate thousands of entries of stored data

Interactive YorkU Map

ANDROID APPLICATION

- Android application written in Java
- Utilized object oriented programming (OOP) simplifying the code structure to make updating the app effortless
- Uses a static map of York University and device location to guide one through Yorks campus
- Displays current longitude and latitude
- Allows for location caching leaving a coloured spot on the map for saved location

Education

York University

Toronto, Ontario

BACHELOR OF SCIENCE (BSC)

Sep. 2015 - May 2022

Computer Science
